In Adobe XD link you can check the content of pages, colors, export SVG icons, and so on. Developer's mode can be found here:

1. Adaptive layout:
   a. Minimum screen resolution: 375px;
   b. Maximum screen resolution: 1920px;
2. Use Bootstrap grid;
3. Don't create a slider, just put arrows;
4. **Creative task**: create an attractive user experience on the page (e.g. some animation) to engage a user to browse the webpage. Important note: use only HTML and CSS. Be creative and use the best UI/UX practices.
